High-performance wired and wireless network scanner with dedicated user touchscreen

For uninterrupted high-volume, batch scanning. With the simplicity of one-touch scanning, securely capture your documents to easily share and collaborate with colleagues, whether they're at home

ADS-4900W

Image capture software

Brother scanners include a comprehensive software suite designed to effectively bring hard copies to life – unlocking information and streamlining your workflow.

You have the freedom to search text and imagery, extract information and optimise or share content, transforming your documents into valuable data resources through industry recognised software.

High-volume scanning

Built for demanding, high-volume workplaces, Brother's range of Kofax certified desktop scanners allow busy departments to batch scan and archive a larger number and wider variety of documents quickly and easily.

From batch scanning large volumes of very thick or thin paper documents to multi-page, mixed batch media, through to embossed plastic cards, all can be scanned continually with the help of a Separation Switch.*

*Separation Switch and Ultrasonic Multifeed Sensor available on ADS-4300N, ADS-4700W, ADS-4900W

Expertly designed with businesses in mind, our scanners help to streamline business processes whilst providing an effortless, user-friendly experience.

Digitise and collaborate

Capture, send and receive business documents quickly and easily. Colleagues in multiple locations can access and view digital documents simultaneously.

They enable you to intelligently capture and optimise the contents of your documents and easily collaborate with colleagues. Whether it's 2-sided A4, business cards, receipts or batch scanning multi-page documents, you can be confident that this range will support you with all your business scanning needs.

Desktop Document Scanner Range

Why scanning?

Reducing the reliance on paper workflows with effective scanning has wider business benefits than just creating searchable files which are easy to share with colleagues. Through a well organised digital workflow, our scanning range can also give your business added data security, help you to build a digitised audit trail, reduce costs and support you in achieving your environmental targets.

File optimisation

Make data searchable with Optical Character Recognition (OCR). Capturing the information in documents enables you to search the content, removing the need to manually open and close each file to find what you're looking for.

Document security

Digital documents make it easier for companies to fulfil their legal responsibility to comply with GDPR regulations for personal data storage. Scanned documents can be password protected, encrypted and saved to a secure location.

Audit compliance

With compliance being a must for many businesses, digital documents simplify the overall process for organisations to adhere to legal and regulatory requirements. Files can be indexed and organised to meet your auditing needs.

Space saving

Reduce clutter and create a paper-light office by removing unnecessary paperwork. With less paper to file, the need for large filing cabinets and lots of individual files can be replaced by a single server anywhere in the office.
